DPM/Taxonomy revision notes

From V.3.0 to V.3.1

Summary of changes:

1) Number of validations from all directives relevant for this version were updated or removed. In some cases, severity was changed from fatal to warning
2) Renaming of Finrep directives:
    a. 98 to 630
    b. 90 to 660
    c. 87 to 680
    d. 88 to 670
3) Fixes in directive 807 and 888 (e.g. change in data type of post code from integer to string, updates of validation rules)
4) Modification in modelling of table 660-41 and 660-42 (affected rows: 23; 24; 28; 29)

Changes in the Dictionary:

1) New elements in BA; GA; TI domain
2) New metrics and few modifications of data types of existing metrics
